BOXER PMS DISCMOWER

Boxer PMS Hydraulic Disc Mower

The Boxer PMS is a hydraulically powered disc mower designed to be mounted on a shovel with EURO or W connection. With its compact construction and powerful performance, this mower is ideal for quick and neat cutting of grass, herbs and light vegetation - perfect for road verges, green spaces, agricultural plots or recreational areas.

What does a disc mower do?

A disc mower cuts with rapidly rotating discs (disks) in which blades are mounted. This technology ensures a smooth and clean cut, even with higher or tougher grass.
